1. Between 8 a.m. and 2:30 p.m. on 1 October 1953, the following aircraft were observed at Aspern (P 49/X 49) airfield: 28 MiG-15s, including 12 parked in one line at a right angle to the flight control building, with the noses pointing to the east and 16 with their noses pointing to the west; 2 bi-planes; 1 Yak-11, and 3 Pe-2s. There was a 2/10 overcast, a northwesterly wind of about 15 km/h, good visibility and a ceiling at about 2,000 meters. At 10:16 a.m., a Yak-11 landed at the field. Air activity by MiG-15s was started at about 10:30 a.m., involving only aircraft of the group parked in the eastern section. The aircraft taxied under their own power to the take-off point and, after the landing, were towed by trucks to their dispersal area. Nine trucks and 5 tank trucks were parked east of the MiG-15s used for flying. About south of the southeastern end of the runway was a van-like truck with a small antenna mast with a cone-shaped bracing and a mobile flight control station. The following take-offs and landings were observed:

Take-Off	Landing
10:30 a.m.	10:55 a.m.
11:15 a.m.	11:38 a.m.
11:45 a.m.	12:16 and 12:17 p.m.
11:57 a.m.	12:28 and 12:29 p.m.
12:35 a.m.	1:06 p.m.

Subsequently, no air activity was conducted up to 2:30 p.m. During the air activity, a sentry wearing black-bordered blue epaulets was posted at the southeastern end of the runway where a field path ran by. The sentry refused passage to all passers-by.
